

The trusted name in pest control industry, **Pest-Cure Incorporation**

Pest- A nuisance

Pest control is a real concern for many people, no matter where they live.

If we suspect pests of any kind, it is vital to make sure we deal with them quickly. Uncontrolled pests could infest our home/office, spread diseases, or cause a number of other significant problems.

There are different pests we might encounter like Cockroaches, Ants, Spiders, Bedbugs, Lizards, Flies, Termites, Mosquitoes, and even birds/animals that can be a problem. Each different type of pest will need to be treated in a different manner.

Whatever pest is causing us distress; the most vital thing we can do is deal with it straight away by getting in contact with an experienced and well qualified Pest control Company.

In an approach towards Environmentalism, we no longer need to rely on traditional pesticides which may pose health risks to combat various pests. Different Eco-Friendly Solutions have modified these actions to substantially reduce the pest problem for a Healthier home, environment and family.

WHAT DO YOU MEAN BY ECO-FRIENDLY SOLUTIONS

Eco-friendly Solutions specializes in non-toxic indoor and outdoor pest control. It helps in combating the pest problems in an ecological way and help in reducing the exposure to harmful pesticides. It is completely safe and perfect for the home, also ideally suited for Offices, Schools or Restaurants, Hospitals or Restaurants.

Advantages of Eco-friendly Pest Control:

- ◆ Eco Friendly Pest Control formula uses a synthesized form of Pyrethrum or third generation insecticides which work on insects' nervous system, with no harm to humans or warm blooded mammals and no harm to the environment or eco system.
- ◆ Eco Friendly Pest Control is odorless, so there is no need to vacate the area to be treated, thus saving man hours & loss of money at businesses such as Hotels, Restaurants, Bars, Bakeries etc.
- ◆ Eco Friendly Pest Control is stain free so no worries about destroying expensive fabrics or bedding.
- ◆ Eco Friendly Pest Control is totally Non-Toxic and completely harmless to humans and warm blooded mammals.
- ◆ Eco Friendly Pest Control kills only what you need it to kill 100% effectively and continues to work silently and safely, protecting your home and family.

ADVANCED PEST MANAGEMENT SERVICES

Treatment procedure of Eco-friendly Pest Control:

There are basically two types of treatment under advanced pest management services:

1. GEL TREATMENT (Cockroaches)-

Gel Treatment is based on the new generation chemical which is highly effective & eco-friendly and used for different types of roaches control with single feeding effect. Once the treatment is applied, its effect will last up to 2 months or until the bait is consumed or destroyed. The application will be directed to the harborages and in the area where water is not used on regular basis. It is not volatile, therefore there are not airborne active ingredients released.

2. CHEMICAL SPRAY (Crawling insects)-

It uses new generation insecticide, which is Odorless, highly active and broad-spectrum with quick-knock down effect. This treatment is applied to all affected area i.e. Stores / Lockers / Toilets etc. The application will be directed to the harborages and surfaces frequented by pests.

It uses insecticide spray of Eco- friendly chemicals of Bayer India Ltd. & other Branded Chemicals to control all Crawling Insects like cockroaches, spiders, Ants, Bed Bugs, Termite etc.

3. RODENTS

The new age Rodent treatment is based on different types of rodent species, extent of infestation and its spread. Treatment combines Baiting, Trapping & Proofing methods. Glue Traps / Bait stations are placed at strategic locations where rats are frequently moved. Glue Traps will be placed at strategic locations in specially prepared bait stations.

ECO-FRIENDLY PRODUCTS

Eco-friendly Solutions also offers Do-It-Yourself (DIY) products such as;

Rodabox - used at commercial sites for Rats,
